Last Week's Program

Our program last week was presented by fellow club member Krista Newkirk, who is the 10th president at Converse College. She gave an overview of the history of the college, which opened in 1890 as a women's private residential college. Current enrollment is 1455 students, with 94% graduating within four years. Krista told us that over 90% of the students receive scholarship or financial aid assistance. The student to faculty ratio is 13:1, and more than 50% of the students have a double or triple major. Converse has 240 student athletes in 13 sports, and is the only women's college to compete at the NCAA Division II level.
